*Jesus' hands and feet to those affected by disaster*

## Flood Cleanup Needs List

- **Water pumps**-(must be the sump pump type that can be submerged in water if you are turning on and leaving to pump water out. Also some new wet/dry vacs come with a water pump built in, you hook up a garden hose and can move water, but they can't be left unattended.)
- **Masks**-respirators may not be necessary all must be **N95** or above rated
- **5 Gallon Buckets**
- **Rubber Work Gloves**
- **Anti-Bacteria/Microbial Chemical**-usually mixes at 2 oz. per gallon of water
- **Garden Sprayer**-back pack version works best
- **Flat Shovels**
- **Flashlights**
- **Wheel Barrows**
- **Large Yard/Heavy Duty Trash Bags**
- **Brooms**
- **Heavy Duty Fans/Air Movers**- local tool rental places, not home models
- **Commercial Dehumidifiers**-you local tool rental places, not home models
- **Wonder Bars**
- **Pry Bars**
- **Hammers**
- **Sledge Hammers**
- **Screw Guns**
- **Boots**-over the over the ankle work boots that are **water proof** are best, tied tight. Waders will work as long as the water isn't higher than the boot
- **Pants**-depending on the cleanup and temps, shorts can be used, same with long sleeved shirts vs short sleeved
- Lots of **water and some sports drinks**, more water than the other
- **Snacks** (my wife told me not to forget that!)
- **Flood Relief Buckets/kits**-this is a good project for someone to put together, some of the bigger relief agencies will be doing this and have some on hand to pass out. Kits include rubber gloves, bleach, clothesline and pins, rags, masks, bug spray, disinfectant soap (dish soap), disinfectant spray, etc

Please see our "Flood Cleanup Procedures" document for detailed cleanup procedures.
